Open id_ed25519 authorized_keys README.md

=====
Development Technology

Front-End:

- HTML, CSS, JavaScript
- React (Front-end framework)
- Map integration libraries (e.g., Leaflet) for location-based features
- Responsive design for mobile and desktop devices

Back-End:

1. Node.js or Python (Server-side scripting)
2. Express.js (Web application frameworks)
3. MongoDB or PostgreSQL (Database management)
4. Geocoding APIs (for mapping and location data)

Features

- ****Search:**** Easily search for dining establishments based on location, cuisine, price range, and more.
- ****Restaurant Profiles:**** Detailed profiles for each restaurant, including information about cuisine, operating hours, contact details, and customer reviews.
- ****Menus:**** Access to digital menus, helping users explore dishes before visiting the restaurant.
- ****Reviews and Ratings:**** Read and write reviews and ratings to share experiences with the community.
- ****Map Integration:**** Integration with mapping services to provide directions to the selected restaurant.
- ****User Accounts:**** Create accounts to save favourite restaurants, track dining history, and receive personalized recommendations.
